

FOR IMMEDIATE RELEASE ON NOVEMBER 15, 2006

### **Dassault Falcon 900EX to ACM Aviation**

San Jose, CA- ACM Aviation announces the addition of a Falcon 900EX to its management fleet. The aircraft arrived in September and is based at the Mineta San Jose International Airport.

This aircraft adds to an extensive fleet of managed aircraft that continues to grow. This new Falcon 900EX joins a freshly added Hawker 800XP and an Embraer Legacy 600 scheduled for delivery in November as part of an impressive array of aircraft including: Global Express, Gulfstreams, Falcons, Challengers, Hawker 800, King Air 350, and Sabre 60's.

ACM Aviation operates a magnificent fleet of corporate aircraft at the Mineta San Jose International Airport and other locations throughout California, the Pacific Northwest, and Florida. ACM Aviation is one of the largest operators on the West Coast and our well-rounded fleet offers our charter clientele a variety of choices and the right aircraft for all mission profiles.

Our fleet of aircraft is flown and maintained by some of the most capable, highly trained pilots and experienced professionals in the corporate aviation industry. Our pilots are dedicated to providing clients with the highest level of safety, convenience and luxury.

ACM is also proud to announce current expansion plans at the Mineta San Jose International Airport. The City of San Jose has tendered 6.2 acres on which ACM will be building 60,000 world class square feet of hangar and office space dedicated to its management customers. This new facility will allow the rapidly growing company to expand to even greater heights. For more information please visit [www.acmaviation.com](http://www.acmaviation.com).
